DETAILED ACTION

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 5, 7 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Zou et al.

Zou et al. teach a water-in-oil emulsion ink comprising an oil phase and a water phase in the amounts as claimed by applicants (see examples). The oil phase comprises an encapsulated colorant, an oil phase oil such as NIREZ 9012 which is a butyl ester of tall oil fatty acid, a surfactant and a film forming component such as hydrocarbon, polyester or terpene resins. The water phase comprises water and optionally additives such as thickening agents, biocides and humectants. See col. 3, lines 50-57, col. 4, lines 8-35, col. 6, lines 18-21 and line 37, col. 10, lines 40-60, col. 11, lines 15-17 and 58-66, col. 13, line 37 and 55, col. 14, lines 61-64, col. 16, lines 53-64, examples 3, 4, 9, 13, 16-18, 24 and claims 27-32, 39, 41 and 42. The water-in-oil emulsion ink as taught by Zou et al. appears to anticipate the present claims.

***Allowable Subject Matter***

Art Unit: 1755

3. Claims 2-4 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: Zou et al. fails to teach or fairly suggest a water-in-oil emulsion ink composition comprising an oil phase and an aqueous phase wherein the oil phase contains an esterified vegetable oil wherein: (1) the esterified vegetable oil is obtained by recycling an esterifying an edible waste oil; (2) soybean oil methyl ester is used as the esterified vegetable oil; (3) soybean oil butyl ester is used as the esterified vegetable oil or (4) the aqueous phase contains the colorant as claimed by applicants.

### ***Conclusion***
